There's no better place to explore the underwater world: the Maldives 90,000 sq km of consistently warm waters offer outstanding visibility and unique diving options including thilas, kandus and ancient reefs. Daily excursions from each of our PADI 5 Star Gold Palm Dive Centres include a two tank morning dive and a one tank afternoon dive, with sunrise, night and other specialty dives available on request. Contact the Dive Centre to put together an exciting and personalised programme during your stay.

THE MALDIVES OFFER THE FOLLOWING DIVE EXPERIENCES:

THILA DIVING Characterised by vast coral formations that top out just beneath the surface, thilas also house colourful crevices and coral-filled overhangs; excellent for close encounters with all sorts of marine life from schooling reef fish and turtles to numerous species of sharks.

MANTAS AND WHALE SHARKS Head to the Maldives between June and October for 'manta season' – from mass gatherings at Hanifaru Bay (Baa Atoll) to the beautiful cleaning station of Lankan Manta Point (North Male Atoll)

KANDU DIVING Kandu (channel) diving involves exciting drift dives along the nutrient-rich currents that flow between the island chains. Sightings include eagle rays and sharks as well as migrating pelagics such as manta rays and whale sharks.

REEF DIVING With vibrant inner and outer slopes, wide edges and fascinating terraces, the Maldivian reefs are a destination in themselves; populated by over 1,000 species of fish, they feature some of the most beautiful corals visible in the world today.

WRECK DIVING Arrange for a special day at sea diving the wrecks of the North and South Male, Lhaviyani and South Ari atolls – from the 110-metre Maldives Victory freighter to the double wrecks at the famous Shipyard site.
